

MARCH HOSPITALITY & TECH RIDER 2017

MARCH

BANDMEMBERS

Thomas Frankhuijzen	Drums (lefty!)
Fleur van Zuilen	Guitar / lead vox
Jeroen Meeus	Bas / backing vox
Kelly Kockelkoren	Guitar / backing vox

CATERING

We would like to have a warm meal for every person.

None of the band members is vegetarian/vegan, although one of us prefers vegetarian meals.

If the venue cannot provide a meal, we would like to receive €14,- per person so we can enjoy dinner elsewhere in your city. We would like some drinks at the venue (beer, soda, water - don't worry. We're not heavy drinkers).

PARKING

We would like to park in the area near the venue. Any parking costs made are to be paid for by the venue/promotor.

ON STAGE

We would like 1 fresh, clean towel per person and at least 8 water bottles (with cap).

PA / MONITORING

The venue must own a decent PA with enough power to cover the whole venue (+/- 110 dBA at FOH).

There must be a capable technician present for setting up and controlling the PA for the duration of the set.

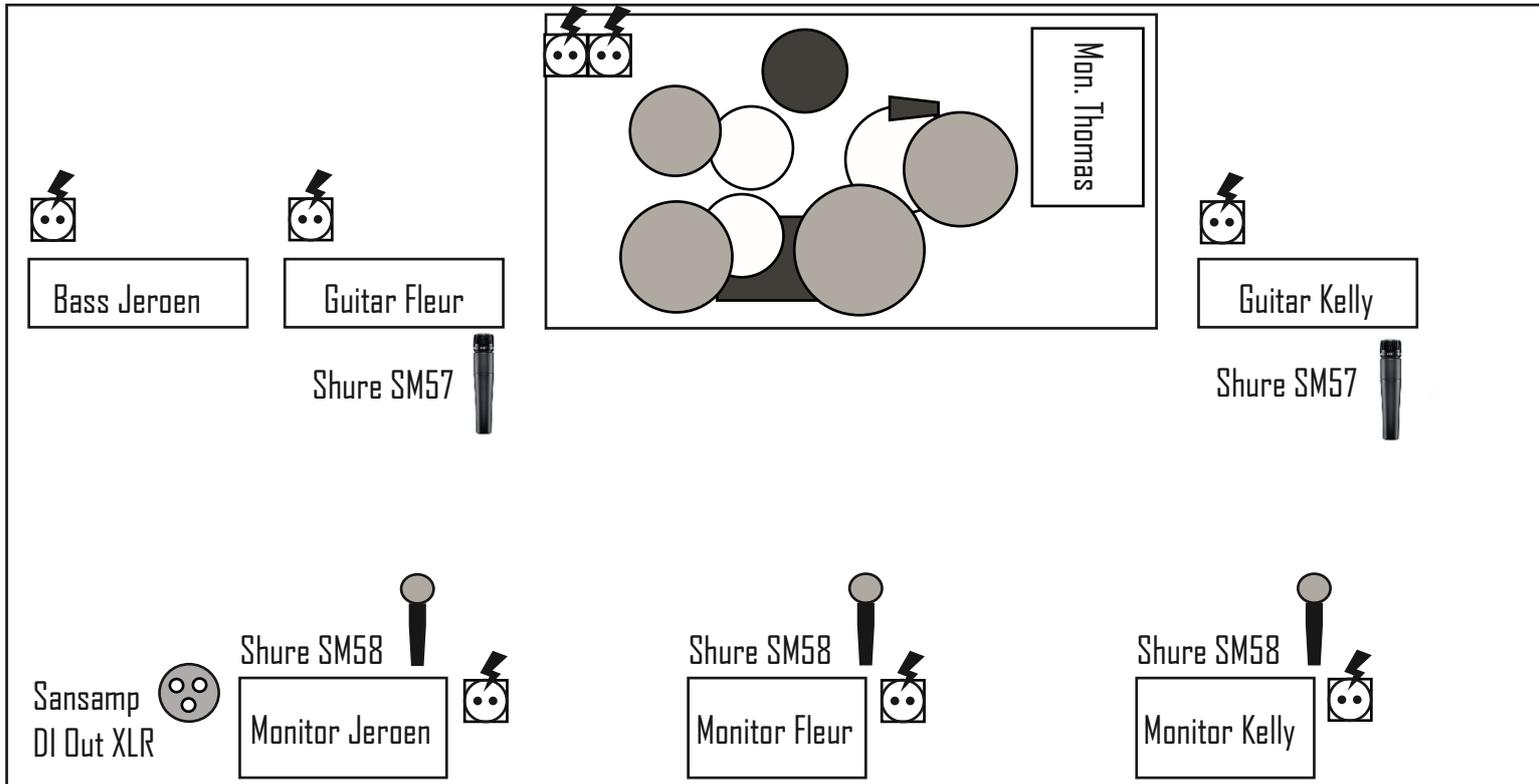

When we are set up and everything works properly, MARCH's soundcheck will take no longer than 45 minutes.

We would like 3 monitors at the front of the stage, plus 1 additional monitor near the drums. Please have 4 monitor channels available.

IMPORTANT: By receiving and reading this file, the venue/organizer is aware of its contents. If the venue/organizer is not capable of providing any of these services, please contact us. Without any contact regarding this rider, the venue/organizer will abide by the contents of this file.

STAGEPLOT

Drum raiser (if present and applicable): 3m x 2m x 15cm

Vooraan op het podium ten minste 3 monitoren, waarvan ten minste 2 monitor-lijnen (XLR stereo) geschikt voor in-ear gebruik (in-ear systeem achter "Bass Bram").

Op de drumraiser (indien aanwezig) 1 monitorlijn geschikt voor in-ear gebruik (XLR stereo).

At the front of the stage at least 3 powersources (Jeroen, Fleur and Kelly).

Near the drums at least 1 powersource.

Every amp needs a powersource as well, so we'd like 3 powersources (1 near every amp).
